As an Intern in Italanta i am responsible for analyzing user requirements, developing software solutions, and testing and debugging code. I am also responsible for collaborating with other developers and stakeholders to ensure that software projects are completed on time and within budget

- Soft Skills.
- Angular
- Flutter
- Cyber Security
- Ethical Hacking

Certification

- Certificate in react
  January-2023
- Certificate in Blockchain and
  Cryptocurrency February-2023
- Certificate in Introduction Ethical Hacking
- Degree in Computer Science
- Certificate in Software
  Engineering February-2023
- Certificate - High school
  2019

My Projects

Fix Moti's
I used React to build a gallery of cards displaying information about cars. They display the make and model, a brief description, the engine and horsepower, and a picture and one can also add his or her image of the car of one's choice.

Car Enthusiast Kenya

It is a car visualizer built for a prospective small auto business looking to move its platform and increase its presence on the internet, which is built using HTML, CSS, JavaScript, and React.

Events Hub

Events Hub Kenya is a react app where one can look for available events in our app and book them. Also, it gives users the right to add their events to the site and be public to everyone. This app was created using reactjs for the front end and Ruby on Rails for the back end.
